Federico De Luca

iOS Developer

About

iOS Developer with over a decade experience in IT fields. I've spent most of my career contributing to the development of leading U.S companies in the food delivery sector, as well as health and wearable technology, being part of staff augmentation services provided by my current employer. I am presently seeking new opportunities which challenge me and lead me to advance in my professional growth.

Academic Qualifications

ORT University (Uruguay)

Jul 2024 *Bachelor of Science in Systems*

Jul 2024 *Systems Analyst (Degree)*

Experience

Present **Orangeloops**

iOS Engineer & Team leader

Working as staff augmentation for leading U.S. companies in the food delivery sector and the health and wearable technology sector, implementing and maintaining their iOS applications. Additionally, I've worked as a team leader, assisting the PM in the role of an intermediary between the client and the rest of

Oct 2020 the team.

Oct 2020 **DecoStar S.A.**

Networks & servers department supervisor

I headed an IT infrastructure team, organizing the incoming work, training team members, giving company-level support both remotely and in person, and acting as a liaison between the client

Jan 2011 and the company.

Skills

iOS Development

The projects I have worked on have allowed me to travel from Objective-C and UIKit to Swift and SwiftUI. They have also given me the chance to learn architectural patterns like MVC (Model-View-Controller) and MVVM (Model-View-ViewModel) and to work with Combine, HealthKit, and Apple Watch applications. Besides office work, I like to challenge myself and develop my professional skills by engaging on personal projects and by following industry-related content creators.

Customer orientation

My role as staff augmentation has enabled me to interact with clients on a daily basis, strengthening my communication skills in the search for solutions that align with their expectations and business needs.

Teamwork

I am at ease with working in a team. I always try to encourage communication among team members since I firmly believe that by doing so performance is enhanced, leading members to feel more confident and to rely on each other.
